

# Danying Xu

## Education

<b>New York University</b>	<i>New York, United States</i>
Master of Science in Computer Engineering, Grade: 3.89/4.0	Sep. 2023 - May. 2025
<b>Southeast University</b>	<i>Nanjing, China</i>
Bachelor of Engineering in Artificial Intelligence	Sep. 2019 - Jun. 2023

## Technical Skills

<b>Programming</b>	Python (Scikit-learn/Pytorch/Tensorflow/OpenAI), C++/C, Linux, Java, SQL, Cypher, $\LaTeX$
<b>Tools</b>	Azure, Hugging Face, Heroku, MySQL, PostgreSQL, Git, Github, Apache Spark/Hadoop, Hive, Dockers, K8s, Neo4j
<b>Methodologies</b>	Machine Learning, Deep Learning, NLP, CV, LLM, Database Management, Dockers, Statistics, Data Analysis

## Professional Experiences

<b>Machine Learning Engineer</b>	<i>New York, United States</i>
Global AI	May. 2024 - Aug. 2024
<ul style="list-style-type: none"><li>Deployed a news chatbot based on <b>LangChain</b> and <b>Streamlit</b> on <b>Heroku</b> using <b>Git</b> for continuous integration.</li><li>Used <b>Bucketeer</b> for <b>AWS S3-compatible</b> storage to efficient handle data input, reducing storage costs by 30%.</li><li>Created a storage optimization method with auto updates for faster web responses, cutting reprocessing time by 95%.</li></ul>	
<b>Machine Learning Engineer</b>	<i>New York, United States</i>
Global AI	Jan. 2024 - Apr. 2024
<ul style="list-style-type: none"><li>Established a <b>Postgres</b> database on 300k+ GDELT news data, boosting time efficiency by 20%.</li><li>Automated database upgrading with parallel processing which enhanced overall efficiency by 15%.</li><li>Analyzed and visualized descriptive statistics on 1 million MSCI US Index stocks to identify trends and anomalies.</li><li>Developed a <b>LSTM</b> model with a 0.4 MSE score, enhancing stock forecasts by 19.7% over the baseline.</li></ul>	
<b>Software Development Engineer in Test</b>	<i>Nanjing, China</i>
Huawei Nanjing Research & Development Center	Aug. 2022 - Sep. 2022
<ul style="list-style-type: none"><li>Conducted <b>Gray Box Testing</b> by examining 143 static path graphs with thousands of functions in C/C++.</li><li>Performed <b>White Box Testing</b> using FUZZ test technology on 872 code files in <b>Linux</b>, expected to improve product performance by 30%.</li></ul>	

## Projects

<b>AI-Generated Text Detection</b>	<i>New York, United States</i>
New York University	Apr. 2024 - May. 2024
<ul style="list-style-type: none"><li>Used Apache Spark to handle and analyze 50k+ human-written and AI-generated sentences.</li><li>Researched state-of-the-art text detection models and trained 3 baseline models with average accuracy of 86%.</li><li>Finetuned the <b>BERT</b> model as a light language model with the accuracy of 93.2%.</li><li>Utilized the <b>LlaMa2</b> model on Google Colab and <b>Hugging Face</b> with prediction accuracy of 65.4%.</li><li>Deployed the <b>ChatGPT3.5 model</b> through <b>Azure OpenAI</b> and <b>Azure Notebook</b> with accuracy of 80.1%.</li></ul>	
<b>Text Gender Bias Rewriter</b>	<i>Nanjing, China</i>
Southeast University	Dec. 2022 - Jun. 2023
<ul style="list-style-type: none"><li>Designed an NLP framework to reduce data gender bias via pattern transform, neural translation and data aggregation.</li><li>Implemented <b>Seq2Seq</b> and <b>Seq2Seq attention</b> models (character/word level) on 148k+ Chinese sentences on <b>Pytorch</b>.</li><li>Devised the Word-Embedding Association Test to Chinese evaluated on <b>CBOW</b> model, reducing gender bias by 45.4%.</li><li>Performed Coreference Resolution downstream task using <b>wwm-RoBERTa</b> model, maintaining consistent performance around 92% after reducing gender bias.</li><li>Conducted Sentimental Analysis on <b>TextCNN</b> model with consistent performance of 80% after reducing gender bias.</li></ul>	
<b>Deep Learning-based Explanatory Brain Science</b>	<i>Nanjing, China</i>
Southeast University	Nov. 2020 - May. 2022
<ul style="list-style-type: none"><li>Extracted 1.2 million images from 1297 videos of trained monkeys playing Pac-Man game using <b>Python (OpenCV)</b>.</li><li>Designed a <b>ConvRNN model with AlexNet and LSTM</b> on <b>TensorFlow</b>, predicting player moves with 84.6% accuracy.</li><li>Performed <b>Class Activation Map (CAM) heatmaps</b> for activation layer visualizations.</li><li>Modified the <b>Grad-CAM heatmap</b> for each layer to interpret the brain's decision-making mechanism with visualizations.</li></ul>	

## Awards and Honors

May 2022	<b>Finalist</b> Interdisciplinary Contest in Modeling (ICM) by COMAP	<i>United States</i>
Nov 2021	<b>Outstanding Award</b> 17th "Challenge Cup" Chinese National Competition	<i>China</i>
